

ALEJANDRO GONZALEZ

Senior AI Engineer · Full-Stack Developer (TypeScript / Python)

me@algoro.dev linkedin.com/in/algorodev Valencia, Spain · Remote

PROFILE

Senior Software Engineer with nearly 8 years shipping production systems across enterprise (Mercedes-Benz), scale-ups (Smartbox), and startups. Hands-on with **AI/ML in production since 2022** — from Big Data & ML platforms at Mercedes-Benz, to introducing AI agents into Smartbox's e-commerce, to founding an AI consultancy serving 15+ companies. Deep expertise in **RAG pipelines, conversational agents, LLM integrations, vector databases, and end-to-end automation infrastructure**. Strong full-stack with TypeScript / Next.js, Python / FastAPI, Node.js, and modern AI tooling (OpenAI, Anthropic, MCP). Open to senior contract engagements and full-time roles at AI-first companies.

EXPERIENCE

Founder & AI Engineer

Oct 2025 — Present

Prozoso — AI & Automation Consultancy · Remote

- Founded a boutique consultancy delivering AI-powered automation; **built and shipped solutions for 15+ clients** across sales, support, finance, operations, inventory, marketing, bookings, HR, and management.
- Designed and deployed production AI infrastructure: **RAG pipelines** over private knowledge bases, **conversational agents**, document processing workflows, and LLM-driven decision systems.
- Stack: TypeScript, Python, Next.js, FastAPI, OpenAI & Anthropic APIs, vector DBs (Pinecone, pgvector), MCP servers, and custom orchestration.
- Owned the full delivery cycle end-to-end: discovery, scoping, build, deployment, client handover, and post-launch iteration.

Senior Software Engineer

Jun 2024 — Dec 2025

Smartbox Group — Experience Gifting Platform · Dublin (Remote)

- **Led the introduction of AI into the e-commerce platform**: shipped a voice-based shopping assistant that guides customers through the catalogue (acting as a virtual shop assistant), and a personalized recommendation agent based on previous purchase history.
- Shipped customer-facing features on a high-traffic e-commerce platform using Vue 3, Nuxt, Pinia, TypeScript, Vite, and SCSS, contributing to engagement and conversion improvements.
- Drove the rollout of **TailwindCSS** as the new design-system foundation, accelerating UI delivery across the platform.
- Implemented end-to-end **observability** (Nuxt + Kibana); led internal Dev Chapter sessions on **TDD** and mentored peers on SOLID and code quality.

Technical Advisor (Contract)

Apr 2025 — Sep 2025

Nexook — Booking Platform Startup · Remote

- Designed and shipped **multi-step booking flows** with Twilio chat, frictionless verification, and promo-code logic on a Next.js stack, improving conversion across funnel.
- Integrated **AI-powered conversational features** using ElevenLabs SDK and Twilio; embedded AI agents into booking processes for automated user interactions.
- Built centralized event-tracking architecture (GTM dataLayer + CleverTap); hardened CI/CD with Playwright and Cypress E2E suites.

Full-Stack Software Engineer

Oct 2022 — Dec 2023

Mercedes-Benz Group — DDX Marketplace (Big Data & ML) · Madrid

- Worked on the **DDX Marketplace**, a strategic Big Data & Machine Learning initiative where data pipelines and cloud infrastructure were the core priority.
- Designed and developed user flows using React, TypeScript, and MaterialUI, with Storybook-driven component documentation.
- Refactored backend endpoints applying functional programming and SOLID in Node.js, Express, and TypeScript; designed **microservices** with NestJS for inter-system data exchange.
- Hardened application security against common attack vectors; ran demos for stakeholders and led Skill Pill knowledge-sharing sessions.

Freelance Full-Stack Developer

Jun 2019 — Jun 2023

Encoderape — Independent Practice

- Designed, built, and deployed full-stack applications for clients (e-commerce, e-learning) using MongoDB, Angular, React, Node.js, Express, Jest, NGINX, Bitbucket CI on AWS; refactored a legacy e-commerce platform improving performance and engagement.

TECHNICAL SKILLS

AI & LLMs: OpenAI & Anthropic APIs, RAG, conversational agents, vector DBs (Pinecone, pgvector, Qdrant), embeddings, prompt engineering, evals, fine-tuning, MCP, ElevenLabs SDK, local LLM runtimes

Languages: TypeScript, Python, JavaScript, SQL

Frontend: React, Next.js, Vue 3, Nuxt, Pinia, TailwindCSS, SCSS, Vite, MaterialUI, Storybook

Backend: Node.js, Express, NestJS, FastAPI, microservices, REST APIs

Data & Infra: PostgreSQL, MongoDB, Redis, AWS, Docker, NGINX, Kibana

Quality & Process: TDD, Playwright, Cypress, Jest, CI/CD (GitHub Actions, Bitbucket), SOLID, SCRUM / SAFe

SELECTED PROJECTS

OpenClaw — Personal AI Assistant
Self-hosted AI assistant on legacy hardware: local LLM runtime, RAG over personal knowledge base, vector storage, custom MCP integrations.

Bilingual Copywriting Agent
Spanish/English LLM-based copywriting system with structured prompting and consistent voice across content formats.

EDUCATION

Senior Technician — Cross-Platform App Development
CIEEP Progres a · 2017–2019

Technician — Microcomputer Systems & Networks
CIEEP Progres a · 2015–2017

CERTIFICATIONS

SAFe® 5 Practitioner

SAFe® 4 Practitioner

AWS Cloud Practitioner

LANGUAGES

English — Professional (B2/C1, 2 yrs in Dublin)

Spanish — Native
